Website	www.immutines.com

The Dutch input list is a public register of commercial products (fertilisers, soil conditioners, plant protection products, and related products) which may be used in organic agriculture in The Netherlands. Since 15 July 2022, the Dutch Input List, next to products for crop production, also contains feed. The use of external inputs is limited to situations where no appropriate alternative management practises and methods exist.

The last update has been effected in November 2025. The next update is foreseen for April 2026.

Restrictions stated for "EU organic legislation" are also valid for the other regulations/standards.

Authorized uses for plant protection: Plant protection products may only be used under the conditions specified by ctgb and basic substances may only be used for the
